

Check_instruction_state
::enter

Shutdown_state::enter

Motor::turn_off

```
graph LR; A[Check_instruction_state::enter] --> D[Motor::turn_off]; B[Shutdown_state::enter] --> D;
```

The diagram illustrates a control logic flow. On the left, there are two rectangular boxes representing states: 'Check_instruction_state::enter' (top) and 'Shutdown_state::enter' (bottom). On the right, there is a gray rectangular box representing an action: 'Motor::turn_off'. Two blue arrows originate from the right side of the 'Check_instruction_state::enter' box and the right side of the 'Shutdown_state::enter' box, both pointing towards the 'Motor::turn_off' box. This indicates that both states trigger the same motor turn-off action.
