

Check_instruction_state
::enter

Motor_control_state
::update

Dual_LED::turn_green

```
graph LR; A[Check_instruction_state::enter] --> D[Dual_LED::turn_green]; B[Motor_control_state::update] --> D;
```

The diagram illustrates a state transition logic. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Check_instruction_state' followed by '::enter' on a new line. The bottom box contains 'Motor_control_state' followed by '::update' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top of a gray rectangular box on the right. The arrow from the bottom box points to the bottom of the same gray box. The gray box contains the text 'Dual_LED::turn_green'.
